Sampling Request Form

Compositing Details *Two options available, see below for details. If you have any questions feel free to contact us at 541-257-5002.*

Submit your form to services@preelab.com

There are two different ways to composite samples in accordance with the OLCC. Usable cannabis may be composited for Pesticide testing (Option 1) or Potency determination (Option 2) under certain conditions listed below. **Please Note : If a composited sample fails testing, consequently all associated samples comprising the composited sample will also fail testing.**

OPTION 1 - Composite for Pesticide : The Rules - (1) All the batches to be composited must have the same Harvest Lot (harvested within 72 hours) and **(2)** must have a combined batch size no greater than 15 lbs. Please list the Product Names (or the last 4 digits of the METRC Source ID) to be composited below.

OPTION 2 - Composite for Potency : The Rules - (1) All the batches to be composited must be of the same strain. **(2)** Batch size is not a factor. **(3)** All the batches to be composited must have the same Harvest Lot (harvested within 72 hours). Please list the Product Names (or the last 4 digits of the METRC Source ID) to be composited below.

#	Composite Type	List The Sample Names or The Last 4 Digits of the METRC ID of The Samples to be Composited
1	Pesticides Potency	
2	Pesticides Potency	
3	Pesticides Potency	
4	Pesticides Potency	
5	Pesticides Potency	
6	Pesticides Potency	
7	Pesticides Potency	
8	Pesticides Potency	
9	Pesticides Potency	
10	Pesticides Potency	

Additional Notes - Please List Any Special Instructions Such at Directions, Gate Codes, etc...
